DESCRIPTORS	Employment Patterns, *Employment Statistics, *Employment Trends, Federal Government, Manpower Utilization, *Occupational Information, Overseas Employment, Salaries, Salary Differentials, Tables (Data), *White Collar Occupations

ABSTRACT

This compilation of information about white-collar personnel employed full-time by the Federal Government in 1968, is intended to assist in analyzing and evaluating manpower utilization and requirements, and in determining policies concerning national manpower resources. It should serve as a basic reference for guidance, counseling, or other personnel concerned with matching jobs and people. The data on occupations, salaries, and employer agencies, etc. are contained in 12 tables. Summary highlights include: (1) Of the 2,093,610 Federal civilian white-collar workforce, over 94 percent were employed full-time in over 450 occupations and 34 percent were women, (2) Postal operations was the largest of all occupational groups, and the 585,838 postal employees accounted for 30 percent of the total group, and (3) Over 80 percent of all full-time white-collar personnel working in the United States (exclusive of the Washington, D.C. area) and 55 percent of those working the D.C. area are concentrated in six major employer agencies--Post Office, the military services, Veterans Administration, Agriculture, Treasury, and Health, Education and Welfare. FOREWORD

The Federal Government, with more than 2 million white-collar and over 800 thousand blue-collar workers, is by far the Nation's largest employer. The majority of these workers, over three-fourths, are in professional, scientific or administrative and support type jobs -- commonly referred to as white-collar occupations. The technology of change during the past decade is reflected in such programs as space exploration, expanded national health and social welfare, improved utilization of natural resources, and increased emphasis on national security. As a result, there has been an increase in the proportion of engineers, scientists, and other professional white-collar personnel making up the Federal workforce.

This publication, the ninth edition, presents information about white-collar personnel employed full-time by the Federal Government in 1968, compared with previous years, their occupations, salaries, and major employer agencies. It is expected that this information will be of assistance in the analysis and evaluation of manpower utilization, in the projection of manpower requirements, and in the determination of policies dealing with national manpower resources. Additionally, it is hoped that it will provide a basic reference for guidance and counseling experts, as well as all others whose concern is the effective matching of jobs and people.

The 1967 edition of OCCUPATIONS OF FEDERAL WHITE-COLLAR WORKERS is available, in a limited quantity, from the Superintendent of Documents, U. S. Government Printing Office (Washington, D. C. 20402) and from the U. S. Civil Service Commission. All pre-1967 editions are out of print but are available for reference in the Civil Service Commission central office, as well as in Government depository libraries and other libraries throughout the Nation.

This report was prepared in the U. S. Civil Service Commission's Bureau of Manpower Information Systems, Charles J. Sparks, Director, by the Manpower Statistics Division, John O. Coleman, Chief.

ACKNOWLEDGMENTS

Project Managers for this report were James H. Vaske and Maxine A. Hughes, Manpower Analysts. Contributors to the data processing, review, and report preparation were: George F. Mills, Chief, Manpower Analysis Section; Irene E. Ferrell, Chief, Statistical Processing Section; Pearl H. Suydam, Edward K. Washington, Jr., and A. La Verne Brown, Statistical Processing Section.

5

* * * HIGHLIGHTS * * *

o The Federal civilian white-collar workforce numbered 2,093,610 in October 1968 - about 21,000 more than in October 1967. Approximately 94 percent (1,963,870) of these personnel were employed full-time in over 450 white-collar occupations. Women (667,234) accounted for 34 percent of the full-time workforce.

o The 585,838 employees in postal operations comprised the largest of all occupational groups and accounted for 30 percent of the total full-time white-collar workforce in 1968. Nearly one-third (452,716) of all employees in the other 22 "non-postal" groups were in occupations reported under the General Administrative, Clerical, and Office Services group.

o The Department of Defense consolidated, as in prior years, was the largest employer with 645,970 full-time white-collar personnel. The Post Office Department, however, was the largest single agency employer with a total of 607,642.

o Over 80 percent of all full-time white-collar personnel working in the United States (exclusive of the Washington area) and 55 percent of those working in the Washington, D.C., metropolitan area are concentrated in 8 major employer agencies - Post Office, Army, Navy, Air Force, Veterans Administration, Health, Education, and Welfare, Agriculture, and Treasury.

THE FULL-TIME WHITE-COLLAR WORKFORCE

Employment Trends

The October 31, 1968 governmentwide survey of occupations indicates that overall, white-collar employment remained relatively stable during the period 1967-1968, increasing less than 2 percent. As in previous years, most of the increase was concentrated in a few agencies and occupations.

Although in effect only four months prior to the time of this survey, the Revenue and Expenditure Control Act of 1968 did have an impact, particularly in agencies in the executive branch of the Federal government. The Act, as amended, required a general reduction of full-time employment by filling only 3 out of every 4 vacancies, except in those agencies where specific functions were excluded by statutory exemptions. In most agencies, the result of not being able to fill 25 percent of the vacancies was a significant reduction in the rate of hiring of new employees at the entry levels.

In a few agencies, expansion of program responsibilities resulted in increased employment. For the most part, such expansions were limited to those functions exempt from personnel ceilings. About 77 percent of the overall increase in white-collar employment since October 31, 1967 occurred within 3 of the 6 agencies with functions that were exempt from personnel ceilings. These white-collar employees were in the postal field service with an increase of 19,283 (over 61 percent of the total increase), defense agencies with an increase in employment in foreign countries of 3,046 (10 percent of the total increase), and Federal Aviation Administration with an increase in air traffic controllers of 1,781 (6 percent of the total increase).

While expansion of postal and transportation operations accounted for the greater share, increases were also apparent for several other occupational fields. In the education field, growth was for the most part among schools for dependents overseas. The impact of the growth is reflected in a gain of nearly 10 percent since 1967 and nearly 9 percent over the two-year period since 1966. Other groups showing a moderate growth trend were: Library and Archives with a gain of 9 percent since 1967 and 20 percent since 1966; Equipment, Facilities, and Service was 6 percent higher than in 1967 and 14 percent higher than in 1966, and Personnel Management and Industrial Relations was up by 6 percent and 16 percent, respectively.

Although somewhat less significant, reductions were apparent in several occupational areas. Employment in both the Biological and Medical Sciences decreased by more than 2 percent as compared to 1967. Reductions were also apparent in a number of the clerical occupations.

Appendix Table G presents the trend of full-time white-collar employment for the years 1957-1968, by occupational group.

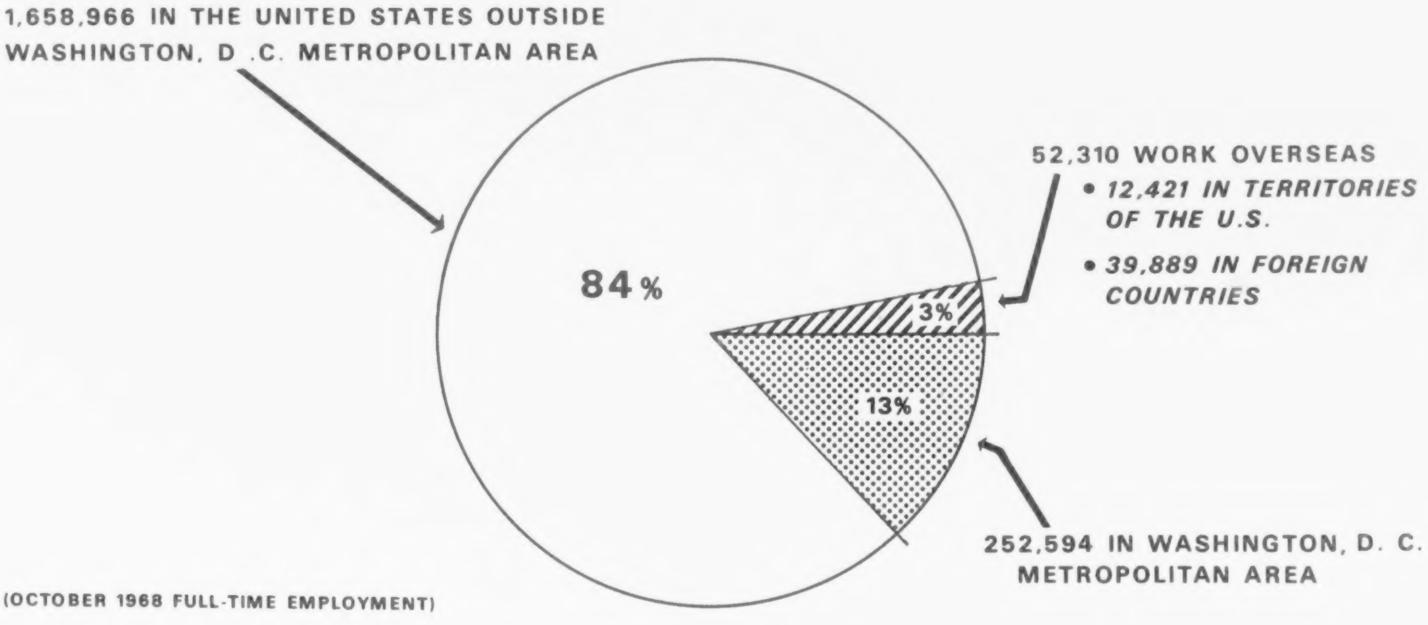
PROFILE OF THE 1968 WHITE-COLLAR WORKFORCE

- Over 97 percent of all full-time white-collar employees work in the United States. About 13 percent are located in the Washington, D.C., metropolitan area. Also see Chart 1, Appendix Tables A-1, and A-2.

- The General Administrative, Clerical, and Office Services group continues to be the most heavily populated. Other occupational groups in which there are significant concentrations are: Education; Social Science, Psychology, and Welfare; Engineering and Architecture; Accounting and Budget; and Supply.

- 104 agencies reported employees in white-collar occupations; however, virtually all (97 percent) white-collar employees are employed by 22 agencies, see Appendix Table E.

CHART 1- OVER 97% OF ALL WHITE COLLAR EMPLOYEES WORK IN THE UNITED STATES



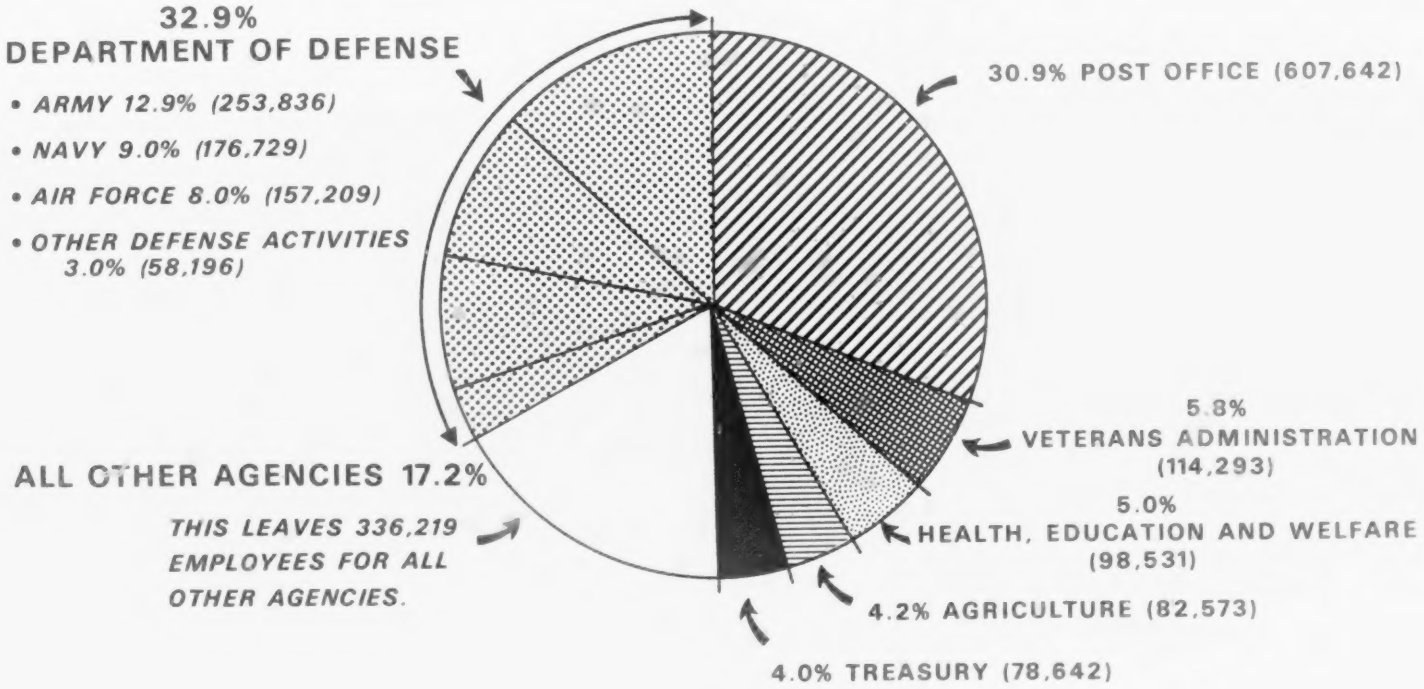
(OCTOBER 1968 FULL-TIME EMPLOYMENT)

- The largest single agency employer was the Post Office Department with 607,642 employees (see Chart 2).

- 16 other agencies reported 10,000 or more white-collar employees. (See also Appendix Table E.)

CHART 2-PERCENTAGE DISTRIBUTION BY SELECTED AGENCIES

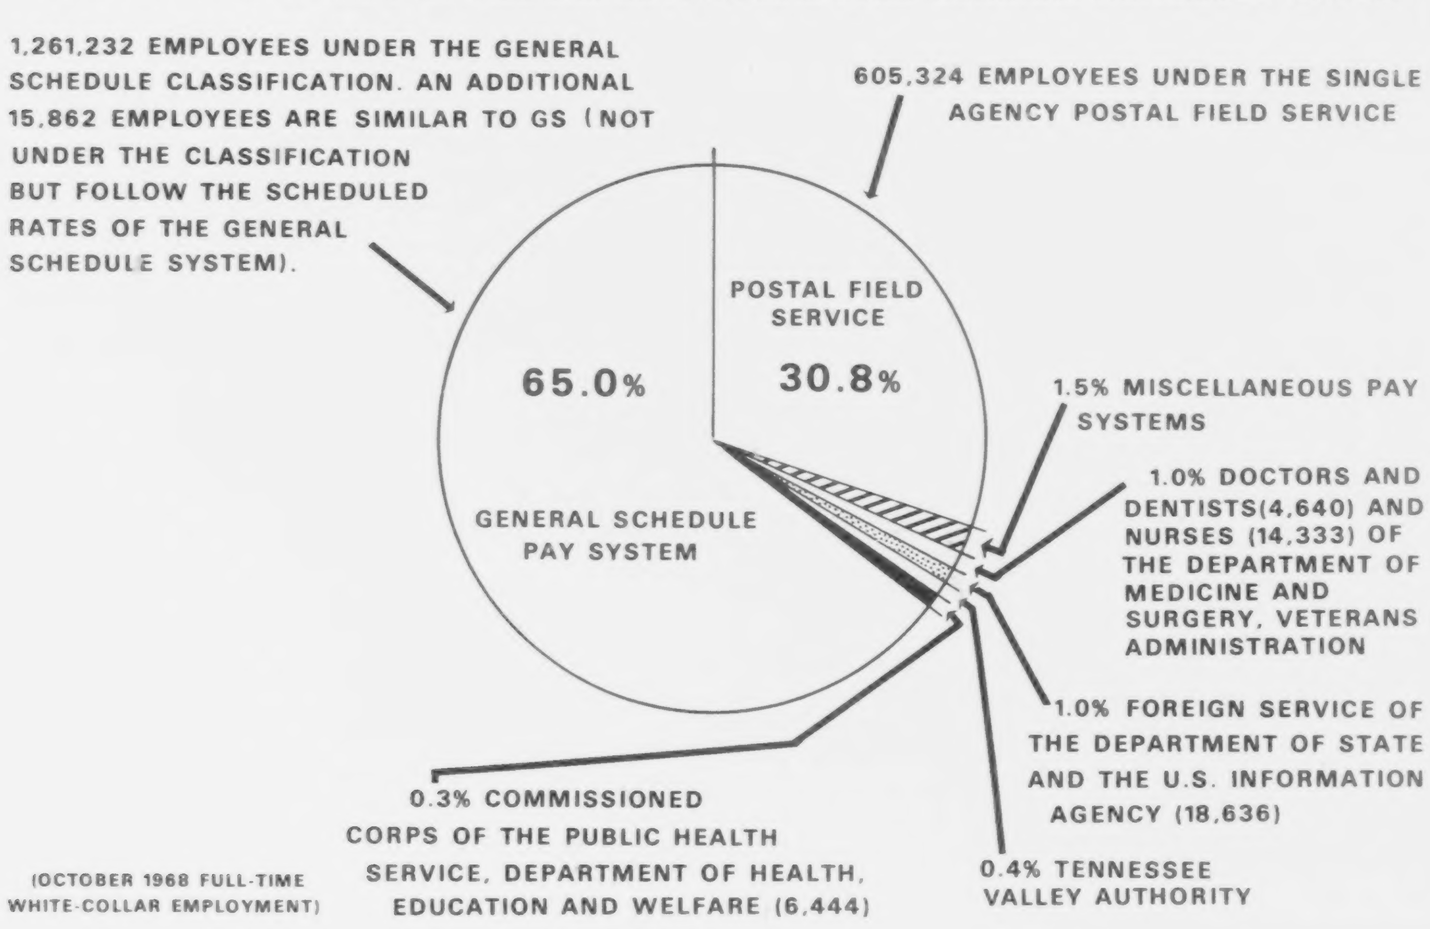
(OCTOBER 1968 FULL-TIME WHITE-COLLAR EMPLOYMENT)



- 8 agencies employ over 80 percent of all full-time white-collar personnel in the United States and 55 percent of those located in the Washington, D.C., metropolitan area.

° Two major statutory pay systems for Federal white-collar employees are the General Schedule and the Postal Field Service. Sixty-five percent of all full-time white-collar employees are paid salary rates of the General Schedule system and 31 percent are paid under the single agency Postal Field Service System.

NEARLY TWO-THIRDS OF ALL EMPLOYEES ARE PAID GENERAL SCHEDULE RATES



(OCTOBER 1968 FULL-TIME WHITE-COLLAR EMPLOYMENT)

OUTLOOK FOR THE FUTURE

With certain administrative modifications, controls on the hiring of Federal civilian employees as started in July 1968 are expected to continue at least through fiscal year 1971. It is anticipated that there will be relatively fewer new hires and that a larger than normal proportion of the new hires will continue to be experienced persons at higher grade levels. There will be a gradual decline in the workforce, with a change in the occupational mix.

The long term trend toward automation of the clerical and support functions, and increased use of professional, scientific, managerial, and technical specialists seems certain to continue.

OCCUPATIONAL ANALYSES AND SALARIES

The average annual salary for full-time white-collar employees worldwide, on October 31, 1968, was $8,776, an increase of $560 since 1967. For men the average salary was $9,815. For women it was $6,757. In the professional occupations salaries averaged $13,618, an increase of $1,020 from last year. Men in professional occupations averaged $14,441 as compared to $9,696 for women. The median "grade equivalent" (see "Definitions and Explanations" section) remained unchanged at 5 for all employees and at 12 for those in professional occupations.

Employees in the Washington, D. C., metropolitan area as a whole received an average salary of $10,701 per annum, while those in professional occupations averaged $15,814. Men in the Washington metropolitan area averaged $13,344 overall and $16,502 in the professional occupations. Women averaged $7,479 overall and $11,693 in the professional occupations. The median "grade equivalent" for all employees in the Washington area rose from 7 in 1967 to 8 in 1968, but remained at 13 for those in professional occupations.

The average salary is generally higher in Washington than elsewhere for two reasons: most agencies have their headquarters here and Washington has a greater proportion of professional employees than the service as a whole. Virtually all of the cabinet officers, executive level administrators, board and commission members are located here; and nearly 23 percent of the workers here are in professional occupations as contrasted to slightly over 14 percent throughout the entire service.

Although above-average salaries prevailed in the Washington area for many occupation series, a small number of employees (1,034) earned on the average, in excess of $22,000. These were all members of the following occupational groups: Hearing Examiner - $25,560; Patent Interference Examining - $25,207; Deportation and Exclusion Examining - $24,969; Patent Administration - $24,065; Program Management - $22,653; General Fish and Wildlife Administration - $22,622; and Foreign Agricultural Affairs - $22,078. Five other occupational groups, with a combined employment of 661, had averages over $20,000. They were: International Cooperation at $21,822; Highway Safety Management - $20,493; Nuclear Engineering - $20,477; Financial Management - $20,278; and Immigration Patrol Inspection - $20,037.

The 41 women employees in the Program Management series received, on the average, an annual salary of $13,521 and the smaller number in Financial Management averaged $16,570. The highest average salary, $25,649, was received by the very small number of women in the Hearing Examiner series.

In the United States outside the Washington, D. C., metropolitan area, the average annual salary for all full-time white-collar employees was $8,423 in 1968. Those in professional occupations averaged $13,177. The median "grade equivalent" remained at 5 for all employees, while for those in professional occupations it rose from 11 in 1967 to 12 in 1968.

Generally, where higher salaries were paid to employees in the 50 states (i.e. outside the Washington metropolitan area) they were paid to employees in the same occupation series as indicated for the Washington area. For example, employees in the Hearing Examiner series averaged $22,268, while those in Deportation and Exclusion Examining averaged $22,238, and those in the Program Management series averaged $20,032.

Some 9,000 employees in 6 other series earned salaries that averaged in excess of $18,000. These higher salaried series were: Highway Safety Management - $19,546; Medical Officer - $19,299; Patent Attorney - $19,276; Hospital Administration - $18,777; Correctional Institution Administration - $18,641; and Dental Officer - $18,093.

A comparison of average salaries for men and women by geographic area and selected occupational groups is shown in the chart on the preceding page. As already noted, it will be seen that the higher salaries are in the professional and scientific groups and tend to be concentrated in the Washington, D. C., metropolitan area. Each of the occupational groups shown is analyzed separately on the subsequent pages. Where feasible, growth potential, contraction, major employer agencies, and salary levels are provided for each occupational group. Selected data for individual occupations are shown in the appendix tables.

SOCIAL SCIENCE, PSYCHOLOGY, AND WELFARE

In the social sciences, employment has shown a moderate growth over the past decade. The rate has accelerated somewhat during the past five years. The number of employees in these occupations increased by 2 percent over the past year to 33.870 in 1968. Over one-third of these positions continue to be located in the Department of Health, Education, and Welfare. The Department of State, the Veterans Administration, and the Departments of the Army and Labor in that order remain as the other major employer agencies. These five agencies together continue to employ over three-fourths of all social science employees in the Federal service. With the exception of the Department of State, each of these agencies show a consistent increase in the number of employees during the more recent years. Economist, Intelligence, and Foreign Affairs, in that order, continue to be the three most heavily populated occupations in the Washington, D. C., metropolitan area. Social Insurance Administration, Social Work, and Recreation remain as the primary classification for employees throughout the 50 states.

Approximately 85 percent of all social science employees were under the General Schedule system. The median "grade equivalent" remained at 11 for all employees, at 12 for men and at 9 for women. The number of employees in upper level positions have shown slight gains during each of the past two years. In 1968, nearly 43 percent of all social science personnel were reported at grades 12 and above, compared with 42 percent in 1967 and 41 percent in 1966.

The number of professional employees in the social science occupations decreased by about 3 percent, to 15,662. This is largely a reflection of the decrease in Economists, the largest of these occupations.

The number of Economists decreased by nearly 3 percent, to 4,325. Significant increases were reported for: Foreign Affairs with 3,595, an increase of over 49 percent; Social Work with 2,445, an increase of over 10 percent; and Psychology with 2,033, an increase of 5 percent. Their average annual salary increased by $1,068 to $14,909. Among these occupations, Foreign Agriculture Affairs continues to pay the highest average salary ($22,078) in the Washington, D. C., metropolitan area. In the 50 states, Manpower Research and Analysis remains the top salaried occupation at $18,929. International Relations and Foreign Affairs ranked second and third for top salaries in both areas.

Of the 4,320 employees in social science occupations working overseas, 71 percent are located in foreign countries and employed by the Department of State. Over two-thirds of these foreign service employees were in the following three professional occupational series: Foreign Affairs, Economist, and International Relations, in that order.

Nonprofessional employees in social science occupations showed a net increase of 1,156 (7 percent) to 18,208 in 1968. Social Insurance Administration, the largest of all social science occupations, increased by more than 8 percent, to 10,743. Intelligence with 3,323, increased by more than 5 percent. The average annual salary for all nonprofessional employees in this group increased by $620 to $10,785. The International Cooperation series, with employment limited to the Washington, D. C., metropolitan area, pays the highest average salary ($21,822). With that exception, Manpower Development, Intelligence, and Social Insurance Administration, in that order, rank as the top salaried occupations for nonprofessionals in both the Washington area and throughout the 50 states.

The Social Insurance Administration series is one of the few occupations where the average annual salary is higher outside the Washington metropolitan area. The average salary was $10,569 throughout the states compared with $9,898 in the Washington area. The primary reason for this is the headquarters for the Social Security Administration of the Department of Health, Education, and Welfare is located at Baltimore, Maryland.

Employment was reported in 24 of the 25 occupational series in the nonprofessional component of this group. Since the last survey two series have been added -- Unemployment Insurance and Recreation Aid and Assistant. One has been discontinued, Social Administration.

PERSONNEL MANAGEMENT AND INDUSTRIAL RELATIONS

Employment in the personnel occupations increased by nearly 6 percent to 39,376 in 1968. Over one-half of the personnel positions continue to be located in the three military departments. The Post Office Department and the Veterans Administration are the other two major employers. These five agencies together employ over 68 percent of the total number reported. Each of these agencies reported increases since 1967.

The Departments of the Navy and Post Office reported increases of 14 and 11 percent, respectively. Personnel Management; Military Personnel, Clerical and Technician; and Personnel, Clerical and Assistance continue to be by far the most heavily populated of the personnel occupations, both in the Washington, D. C., metropolitan area and throughout the 50 states.

Over 90 percent of all employees in this group were paid salary rates of the General Schedule system. The median "grade equivalent" for all employees remained at GS-7. The number of employees in upper level positions as a proportion of the group total remained virtually unchanged at 24 percent, a situation that has prevailed for the past several years. The average annual salary for the group increased by $505 to $9,538. Men averaged $12,062 and women $7,444, respectively.

Military Personnel Clerical and Technician, the largest occupation in the group, showed an increase of slightly over 11 percent to 9,941. The other two heavily populated series Personnel Clerical and Assistance and Personnel Management showed a gain of 6 percent and a decrease of 1 percent, respectively. Worthy of note, however, is the significant change in the Military Personnel Management occupation, where only 6 employees having an average salary of $9,562 were reported in 1967. For this same occupation, employment in 1968 was 290, with an average salary of $11,578.

Employment was reported for each of the 14 occupational series in this group. Qualification standards for entry level positions classified under these occupations, generally, do not require rigid professional or academic training. No series were added or discontinued since the 1967 survey.

GENERAL ADMINISTRATIVE, CLERICAL, AND OFFICE SERVICES

This is by far the most heavily populated of all non-postal white-collar groups and ranks second only to the Postal Operations Group. Nearly one-third of all non-postal white-collar employees (governmentwide) are in occupations reported under this group. It includes a broad range of jobs and salary levels from the messenger who received an average annual salary of $4,389 to the top level agency administrators and many of the cabinet secretaries, who are appointed by the President. Also included in this group are the data processing and most of the clerical occupations. With the exception of the few smallest commissions, usually established for a very short existence, all agencies have employees in this group. The major employing agencies, however, are the three military departments, the Department of Health, Education, and Welfare and the Veterans Administration. In 1968, slightly over 72 percent of all positions in this group were held by women.

Total employment in the group decreased since the October 1967 survey by percent to 452,716. It is significant, however, that the number of men in these occupations increased by nearly 3 percent since 1967, while the number of women decreased by somewhat over 2 percent. Most of the larger agencies showed decreases, ranging from several hundred to over 2,500. In contrast, the Department of Navy reported an increase of 2,555. The General Clerical and Administrative series continues to be by far the most heavily populated occupation in both the Washington area and throughout the 50 states. Secretary and Clerk-Typist, in that order, are the other two major occupations in the Washington area. Clerk-Typist and Clerk-Stenographer and Reporter rank second and third throughout the states. These three occupations account for 62 percent of all employees reported under this group in the Washington area and over 57 percent of those reported throughout the states. Trend data for secretaries and clerk-typists are shown in the text table below.

Almost 95 percent of the employees in this group are paid salary rates of the General Schedule system. The median grade equivalent for all employees rose from 4 in 1967 to 5 in 1968, while remaining at 9 for men and 4 for women. The especially large number of lower grade employees in clerical jobs far outweighs the number of upper level administrators. In 1968, 10 percent of all employees in this group were reported at grades 12 and above, compared with 9 percent in 1967 and slightly more than 8 percent in 1966. The average annual salary for the group was $7,398, an increase of $472. The average for men was $10,718 and women $6,127. In the Washington area the average salary was $8,695.

Trend of Secretaries and Clerk-Typists
1958 to 1968

	1958	1960	1962	1964	1966	1967	1968
Total	166,325	165,847	188,265	184,531	211,679	212,091	197,564
Clerk-Steno and Reporter	51,635	48,107	53,129	51,859	53,256	51,827	47,916
Secretary	30,946	41,082	49,944	54,935	57,140	59,512	60,999
Clerk-Typist	77,601	70,381	78,105	70,647	93,970	93,430	81,533
All Others	6,143	6,277	7,087	7,090	7,313	7,322	7,116

Growth in the field of automatic data processing continued at a significant rate. Overall employment in these occupations has increased by nearly 7 percent since 1967 and 20 percent since 1966, reflecting the phenomenal growth in the "computer occupations". As evidenced in the chart that follows, employment in all other related data processing occupations decreased by over 7 percent. The three military departments continued to be the major employers of ADP personnel. The Departments of the Treasury and Health, Education, and Welfare also employ a sizable number.

Total employment in the computer occupations (30,232 in 1968) has increased by over 18 percent since 1967 and over 47 percent since 1966. The largest net increase, 2,123, or slightly over 14 percent since 1967, occurred in the Computer Specialist series. This series is the most heavily populated of all ADP occupations. The Peripheral Computer Equipment Operation series showed an increase of 475, or nearly 51 percent, for the highest percentage growth. The average annual salary for these two occupations in 1968 were $11,921 and $5,751, respectively. The Digital Computer Systems Administration series increased by nearly 5 percent, while the Digital Computer Systems Operator showed an increase of slightly over 15 percent since 1967. Employees in these two occupations average $16,190 and $8,188 per annum, respectively. Since 1967 an increase of over 47 percent has also occurred in the Computer Aid and Technician occupation. Their average salary in 1968 was $6,944.

Trend of Data Processing Occupations
1958 to 1968

Occupational Functions	1958	1960	1962	1964	1966	1967	1968
Data Processing Occupations, Total	23,738	27,547	31,917	33,852	41,886	47,215	50,289
Computer Occupations	3,010	6,617	10,372	14,231	20,522	25,596	30,232
Digital Computer Systems Admin.	(330)	(639)	(964)	(1,107)	(1,238)	(1,231)	(1,291)
Digital Computer Systems Operation	(737)	(1,453)	(2,677)	(3,728)	(5,523)	(6,550)	(7,547)
Peripheral Computer Equipment Oper.	(226)	(608)	(625)	(604)	(766)	(937)	(1,412)
Digital Computer Systems Analysis & Programming	(1,717)	(3,917)	(6,106)	(8,792)	(12,995)	(16,878)	(19,982)
Card Punch Operation	8,664	10,216	11,562	12,276	16,075	17,145	16,166
Electric Accounting Machine Occupations	12,064	10,714	9,983	7,345	5,289	4,474	3,891

Among the non-computer occupations, Card Punch Operator, still the second largest of the ADP occupations, decreased by nearly 6 percent to 16,166. A drop of 583 also occurred in the electric accounting machine occupations. EAM equipment operators decreased by over 12 percent to 3,305, while the Project Planners decreased more than 16 percent to 586.

Employees were reported in each of the 40 occupational series under this group. Generally speaking, qualification standards for entry level positions classified under these occupations do not require rigid professional or academic training. No series were added or discontinued since the 1967 survey.

BIOLOGICAL SCIENCES

Employment in the biological sciences decreased by more than 2 percent in 1968, to 40,900. Nearly two-thirds of all employees [illegible] this group are in professional occupations. The Department of Agriculture continues to be by far the leading employer, having 27,822 employees or over 68 percent of all personnel in this group. Other major employers are the Departments of Interior; Health, Education, and Welfare; and Army.

Biological Technician, General Biological Science, and Microbiology, in that order, remain as the major occupations in the Washington area. Forestry, Soil Conservation, and Biological Technician continue to be the most heavily populated throughout the 50 states.

Over 98 percent of all biological science employees were paid salary rates of the General Schedule system. The median grade equivalent remained at 9 for all employees and for men, and at 7 for women. The ever increasing demand for professional skills in biological research is reflected in the increased number of employees in upper level positions as a proportion of the group total. In 1968, nearly 23 percent of all biological science positions were reported at grades 12 and above, compared with 21 percent in 1967 and 20 percent in 1966. The average annual salary for the group was $10,220, an increase of $750 since 1967. Men averaged $10,328 and women $8,586.

Since 1967, the number of employees in the 26 professional biological science occupations has decreased by 58, to 26,863. Forestry remains the largest occupation with 5,924, despite a decrease of nearly 3 percent. Soil Conservation, the next largest occupation, also showed a slight decrease, to 4,802. The two other sizable professional occupations, Agricultural Management and General Biological Science, showed small increases, to 3,299 and 2,492, respectively. Employment in Soil Science decreased slightly, while an increase of nearly 5 percent was reported in the Microbiology series. In Home Economics, where women make up nearly 99 percent of the employment, a decrease of 19 percent was reported. The average annual salary for all professionals in this group increased by $856 to $11,848. Men averaged $11,899 and the 1,230 women averaged $10,778.

The General Fish and Wildlife Administration series continues to carry the highest average salary both in the Washington area ($22,622) and throughout the 50 states ($17,931). Ranking second and third for average annual salaries were Agricultural Extension ($18,636) and Forestry ($18,583) in the Washington area, and Pharmacology ($15,939) and Physiology ($15,639) throughout the states.

Nonprofessional employment in these occupations decreased over 6 percent, to 14,037. Biological Technician, the largest group, decreased by nearly 3 percent to 4,561. Among the other larger occupations, Forestry Technician and Soil Conservation Technician decreased slightly, to 3,101 and 2,854, respectively. Forest and Range Fire Control, the only other sizable group, decreased by more than 33 percent, to 1,534.

The average annual salary for the nonprofessional employees in these occupations was $7,116, an increase of $377 since 1967. Men and women averaged $7,174 and $6,555, respectively. The Fish Hatchery Management series continued to pay the highest average salary to nonprofessional employees both in the Washington area ($16,659) and throughout the states ($9,975). Next in order in the Washington area were Irrigation System Operation ($13,000) and Forestry Technician ($10,120). In the 50 states the next highest paid nonprofessionals are Park Rangers ($8,757) and Range Technicians ($7,155).

Employees were reported in each of the 36 occupation series in this group. No series were added or discontinued since the 1967 survey.

ACCOUNTING AND BUDGET

The Accounting and Budget group is the third largest of the non-postal occupational groups. The 114,439 employees reported in this group of occupations in 1968 represents an increase of about 1 percent, as compared to 1967. The number of women increased by 1,727 (slightly over 3 percent) to 54,649, while the number of men decreased by 253, to 59,799. Almost all agencies reported some employees in this group. However, the Department of the Treasury, with nearly 27 percent of the total, remains by far the largest employer. The three military departments and the Post Office Department also reported sizable numbers.

In most of the major employer agencies, employment remained rather stable. The Department of the Navy, however, reported an increase of more than 8 percent.

Accounting continues to be the most heavily populated in all geographic areas. Other occupations with significant populations in the Washington area are Budget Administration and the General Accounting Clerical and Administrative series. Outside the Washington area, Internal Revenue Agent and Accounting Technician are the most populous.

Nearly 94 percent of all accounting and budget employees are paid the salary rates of the General Schedule system. The median grade equivalent remained at 7 for all employees, at 11 for men and 5 for women. In 1968, nearly 21 percent of all accounting and budget personnel were reported at grades 12 and above, compared with nearly 20 percent in 1967 and 19 percent in 1966. The average salary for the group increased by $544 to $9,322.

Accountant and Internal Revenue Agent are the only professional occupations in this group. Their combined employment represents 29 percent of the overall group total and accounts for 12 percent of the total professional employment in all white-collar occupational groups. The number of accountants increased by 2 percent, to 20,182. Nearly one-half of all accountants are in the defense agencies. Another 12 percent are employed by the General Accounting Office. With the exception of 4 positions divided among the three military departments, all Internal Revenue Agents are employed by the Internal Revenue Service, Department of Treasury. Average salaries in the Washington metropolitan area were $14,773 for accountants and $14,440 for Internal Revenue Agents, while throughout the states these employees averaged $12,152 and $13,092, respectively.

Nonprofessional accounting and budget employees increased by slightly over 2 percent to 81,063. Among the larger occupations, Accounting Technician increased by 3 percent, Accounts Maintenance Clerical by 2 percent, General Accounting Clerical and Administrative by 1 percent, Tax Accounting by 3 percent, and Budget Administration by 6 percent. Women continue to occupy nearly two-thirds of all nonprofessional positions in this group. The overall average annual salary was $7,816, an increase of $395. Men averaged $9,583 and women $6,876. As in previous years, employees in the Financial Management series received the highest average salary -- $20,278 in the Washington area and $16,580 throughout the 50 states. Nonprofessional employees in the following occupations also continued to receive above average salaries: Budget Administration - $14,439 in the Washington area and $11,003 throughout the 50 states; Financial Institution Examining - $14,091 and $11,077, respectively; and Budget and Accounting - $13,960 and $12,068, respectively.

Employment was reported for all of the 20 occupational series in this group. No series have been added or discontinued since the 1967 survey.

MEDICAL, HOSPITAL, DENTAL, AND PUBLIC HEALTH

Although the number of employees in medical and health occupations decreased by about 2 percent to 94,169 in 1968, this group ranks fourth in size among the 22 non-postal white-collar occupational groups. Women make up 53 percent of its total employment. For the most part, employment is concentrated in two agencies. Almost two-thirds of all employees work for the Veterans Administration in its Department of Medicine and Surgery. Another 17 percent work for the Public Health Service under the supervision of the Department of Health, Education, and Welfare. The three military departments employ nearly all of the others.

Nearly three-fourths of all medical and health personnel continue to be concentrated in three occupational series. Nursing Assistant, predominantly in the Veterans' hospitals, remained by far the most heavily populated both in the Washington metropolitan area (2,521) and throughout the states (34,165). The other two occupations are Medical Officer and Nurse.

Seventy-one percent of all medical and health employees are paid the salary rates of the General Schedule system. The median "grade equivalent" remained at 6 for all employees and for women, and at 5 for men. The number of employees in upper level positions as a proportion of the group total remained virtually unchanged. In 1968, as well as in 1967, 15 percent of all medical and health personnel were reported in grades 12 and above, compared with 14 percent in 1966. The average annual salary for the overall group increased by $487 to $8,709. Men averaged $10,004 and women $7,557, respectively.

In the 20 professional medical occupations, the number of employees decreased by about 2 percent, to 41,229. Professional employees represent 44 percent of the overall group total and account for 15 percent of the total professional employment in all occupational groups. Sixty-three percent of the professionals in this group were women. The nurse series, where employment consisted of 97 percent women, remained the largest occupation with 22,068, despite a 3 percent decrease. Medical Officer, the next largest occupation, of which over 93 percent are men, also decreased 3 percent to 9,854. Employment in the other two sizable professional occupations -- Medical Technologist (73 percent of whom were women) and Dental Officer, (all but 7 were men) showed small increases to 1,581 and 1,331, respectively. Employment in both the Pharmacist and Dietitian series decreased by 3 percent. The median "grade equivalent" for all professionals remained at 9, while for men it rose from 12 to 13 and for women it rose from 8 to 9. The average annual salary for all professionals increased by $718, to $11,954. Men averaged $16,417 and women $9,305. Salaries in the Washington area and throughout the states averaged highest for employees in the following occupations: General Health Science - $19,061 in the Washington area, and $14,600 throughout the 50 states; Dental Officer - $18,839 and $18,093; and Medical Officer - $17,892 and $19,290, respectively.

Employment in the nonprofessional medical occupations decreased by 2 percent to 52,940. Seventy percent of these employees were in the Nursing Assistant series, which decreased 3 percent, to 36,839. The number of men in this series dropped from slightly over 52 percent in 1967 to slightly less than 51 percent in 1968. Some of the other heavily populated occupations, such as Medical Technician, Dental Assistant, and Physical Medicine and Rehabilitation Therapy Assistant, also showed small decreases. Public Health Program Specialist, Medical Radiology Technician, and Medical Aid each showed a slight increase.

The average annual salary for nonprofessionals in these occupations increased by $319, to $6,184. Men averaged $6,609 and women $5,671. Salaries in the Washington area and throughout the states were highest for employees in the following series: Hospital Administration, $19,558 and $17,777, Prosthetic Representative, $13,329 and $10,802, and Public Health Program Specialist, $13,228 and $11,605, respectively.

Employment was reported in each of the 46 occupational series within this group. No series were discontinued; however, 21 employees were reported in the nonprofessional Pathology Technician series, which has been added since the 1967 survey.

VETERINARY MEDICAL SCIENCE

Employment reported for this group is all in the professional Veterinary Medical Science series, which increased 5 to 2,398. The Department of Agriculture was by far the major employer, having over 91 percent of the total employment, The only other significant employer was the Department of Health, Education, and Welfare. Almost 95 percent of all veterinary employees were paid the salary rates of the General Schedule system. The median "grade equivalent" remained at 12 for all employees and for men, and at 11 for women. The average annual salary for all employees was $13,574, while the 27 women veterinarians received an average of $12,342 per annum.

There are only two occupational series in this group. No employment has been reported in the nonprofessional Veterinary Student Trainee series since the 1966 survey.

ENGINEERING AND ARCHITECTURE

Employment in the engineering occupational group (147,374 in 1968) continued to rank second in size among the non-postal occupational groups. Professional employees represent almost 57 percent of the overall group total and account for 30 percent of the total professional employment in all white-collar occupational groups.

Civil Engineering, virtually unchanged since the 1967 survey, remained the largest of the professional engineering occupations with total employment at 17,596. Electronic Engineering, the next largest of the engineering occupations, increased by nearly 5 percent, to 15,719. Of the other three sizable professional occupations, General Engineering and Aerospace Engineering increased 6 percent and 1 percent, respectively. Meanwhile, Mechanical Engineering decreased by slightly more than 2 percent.

The Department of Defense is by far the largest employer, having over 61 percent of all employees. Other significant employers are the Departments of Transportation and Interior, and the National Aeronautics and Space Administration. The Departments of the Navy, Air Force, and Transportation reported increases of 8, 6, and 2 percent, respectively. Conversely, the Department of the Interior reported a decrease of about 5 percent. Smaller decreases were also reported by the Department of the Army and the National Aeronautics and Space Administration.

Electronic Engineering (3,253), General Engineering (2,423), and Engineering Technician (2,295) remain the major occupations in the Washington area. Within the United States as a whole, the major Engineering and Architecture occupations are: Engineering Technician (25,360), Electronic Technician (19,024), and Civil Engineering (15,085).

Ninety-seven percent of all Engineering and Architecture employees are paid salary rates of the General Schedule system. The median grade equivalent remained at 11 for all employees and for men, and at 7 for women. The number of employees in upper level positions as a proportion of the group total has shown a slight but steady increase during each of the past 3 years. In 1968, nearly 46 percent of all engineering personnel were reported in grades 12 and above, compared with 44 percent in 1967 and 43 percent in 1966.

For professional engineers the overall median grade equivalent was 12, the same as in 1967. Although most engineering personnel were receiving salaries well above the average ($15,000), those in Nuclear, General, and Aerospace Engineering remained at the top of the salary range both in the Washington area and throughout the states. The salary range for these three series was from $15,442 to $20,477.

Slight gains were also reported in the nonprofessional engineering occupations. Seventy-eight percent of the 64,000 employees in this group were reported in two occupational series -- Engineering Technician (27,957) and Electronic Technician (21,780). As with the professional employees in these occupations, the majority (over 57 percent) of all employees in these two occupations were employed by the 3 military departments.

In the Washington area, higher average salaries continued to be reported for Construction Analyst ($13,306), Electronic Technician ($10,927), and Engineering Technician ($10,817). Meanwhile, throughout the states the higher salaries were received by: Shipbuilding Inspectors ($13,044), Ship Surveyors ($12,188), and Construction Analysts ($11,580).

Employment was reported in each of the 32 occupational series in this group. No series have been added or discontinued since the 1967 survey.

LEGAL AND KINDRED

Employment in the Legal and Kindred occupations (45,777 in 1968) increased by about 2 percent over 1967. This group ranks seventh in size among the non-postal occupational groups. The Department of Health, Education, and Welfare, by far the largest employer (at 17,169), reported an increase of slightly more than 4 percent. The Veterans Administration, the Departments of Justice, Treasury, and Army, in that order, are the only other large employers of legal personnel. General Attorney, with 4,845 employees continues to be the predominant occupation in the Washington metropolitan area, followed by Legal Clerical and Administrative with 675. On the other hand, Claims Clerical with 10,611 and Social Insurance Claims Examining with 7,573 remain as the most heavily populated throughout the states.

About 83 percent of all employees in legal and kindred occupations were paid salary rates of the General Schedule system. The median grade equivalent remained at 8 for the entire group and at 5 for women. For men the median grade equivalent rose from 11 in 1967 to 12 in 1968. The number of employees in upper level positions as a proportion of the group total has shown little change over recent years. In 1968, slightly under 25 percent of all legal related personnel were reported at grades 12 and above, compared with 24 percent in 1967 and 25 percent in 1966. The average salary for the overall group increased by $655 to $10,623 in 1968. The average salary for men and women was $13,566 and $7,384, respectively.

Professional employment which includes all legal positions requiring admission to the bar, represents 25 percent of the overall group total.

While most of the major agencies each reported at least 100 attorneys, 34 percent of all personnel in this series were employed by two agencies -- the Departments of Justice (2,107) and Treasury (1,289). The second most populous professional occupation is Hearing Examiner with 600, and showed a net increase of 36 since the 1967 survey. The median grade for this occupation, all positions of which are under the General Schedule classification, remained at GS-16. The average salary increased by $1,880 to $23,864.

The number of nonprofessional employees in the legal occupations increased by nearly 4 percent to 34,357. The largest occupation in the entire group, Claims Clerical, accounted for nearly one-third (10,882) of the nonprofessional total. The other significantly populated occupation, Social Insurance Claims Examining, increased 7 percent to 7,575. Employees in these two occupations, over 90 percent of whom were employed by the Social Security Administration (Department of Health, Education, and Welfare), represent nearly 54 percent of all nonprofessionals in this group. The 6,322 employees in the Miscellaneous Legal and Kindred series are exclusively in the Judicial Branch and work as support staff to Federal judges and courts throughout the United States.

For all nonprofessionals in this group the average annual salary increased by $455 to $8,187. Men averaged $10,160 and women $7,091. Occupations having the highest average salaries in the Washington area and throughout the states, respectively, were: Tax Specialist - $14,859 and $11,450; Estate Tax Examining - $13,966 and $13,691; Workmen's Compensation Claims Examining -

$13,148 and $13,069; and Veterans Claims Examining - $12,992 and $11,546.

Employment was reported in each of the 24 occupational series in this group. No series have been discontinued since the 1967 survey. However, the professional Law Clerk series was added in August 1968 and the Estate Tax Examining series was removed from the professional classification effective April 1968.

INFORMATION AND ARTS

Since 1967, this group has remained relatively stable with 20,380 employees (320 more employees or a 2 percent increase). The largest concentration is in the Department of Defense where nearly 57 percent of these personnel are employed. Other large employers are the Departments of Health, Education, and Welfare (985), Agriculture (832), and Interior (714).

Public Information and Writing and Editing continue to be the major occupations in the Washington area, while Photography, Illustrating, and Technical Writing and Editing are the three most heavily populated series throughout the states. The median grade equivalent remained the same in both areas for all occupations except Illustrating which rose from 8 to 9.

Ninety-one percent of all employees in this group were paid at salary rates of the General Schedule system. The median grade equivalent remained at 9 for the overall group, at 11 for men, and at 7 for women. In 1968, twenty-seven percent of all personnel in this series were at grades 12 and above. That proportion has remained virtually constant since 1966. The average salary for the group increased by $582 to $10,742 in 1968.

Museum Curator is the only professional occupational series in this group. The number of employees in this series increased from 157 in 1967 to 165 in 1968. As might be expected, most of these personnel (54 percent) are employed by the Smithsonian Institution. However, the three military departments reported a combined total of 36 and the Department of the Interior 30. Over two-thirds of all curators work in the Washington area. The median grade remained at 12 for all employees in this group with an average annual salary of $13,552.

Employment in the nonprofessional occupations increased by 312 to a total of 20,215. Photography (3,335), Illustrating (2,852), and Public Information (2,328) are by far the largest occupations in this group. Together, they account for 42 percent of the total. The overall average annual salary for the nonprofessional was $10,719. Average salaries were highest for the following series: Public Information - $16,263 in the Washington area and $12,040 in the remainder of the United States; Foreign Information - $16,123 and $16,512, respectively; and Audio-Visual Production - $13,500 and $12,454, respectively.

Employment was reported in each of the 19 occupational series in this group. Except for the Museum Curator series, qualification standards for entry level positions classified under these occupations, in general, do not require rigid professional or academic training. No series were added or discontinued since the 1967 survey.

BUSINESS AND INDUSTRY

This group (55,284 in 1968) ranks sixth in size among the non-postal occupational groups. Employment in these occupations increased slightly, by about 3 percent. Defense agencies are by far the largest employers of these personnel, having over 60 percent of the total. Another 10 percent of the total were employed by the Department of the Treasury. Other comparatively large employers were the Department of Housing and Urban Development, General Services Administration, Interior, National Aeronautics and Space Administration, Veterans Administration, and Agriculture. All of these agencies reported small increases except the Treasury, Agriculture, and the National Aeronautics and Space Administration.

The Contract and Procurement series has consistently been the most heavily populated occupation during the past decade in both the Washington area and throughout the states. In 1968, this occupation numbered 2,775 in the Washington, D. C. area and 15,381 in the 50 states. Other occupations continuing to have significant numbers in the Washington area were General Business and Industry with 1,082 and Industrial Specialist with 677. Production Control with 7,491 and Internal Revenue Officer with 5,791 remained next in order of size throughout the states.

All employees in this group were paid at salary rates of the General Schedule system, with the exception of 525, who for the most part are under the foreign service and postal systems. The average annual salary for the group as a whole increased by $761 to $11,590. The median grade remained at 11 for the entire group and for men, and at 9 for women. The number of employees in upper level positions as a proportion of the group total has shown slight but steady gains during the past several years. In 1968, nearly 34 percent of all personnel were reported at grade 12 and above, compared with 32 percent in 1967 and 31 percent in 1966.

Over one-third of all employees in the Business and Industry occupations were concentrated in one series -- Contract and Procurement. The numbers of personnel in this series increased by 3 percent to 18,540. The major employers of Contract and Procurement personnel are the defense agencies. The next largest occupation, Production Control, showed an 18 percent gain to 7,774. Another of the larger occupations, Internal Revenue Officer decreased by nearly 8 percent to 5,946. It is significant, however, that the median grade for women in this occupation rose from 7 in 1967 to 9 in 1968. For men the median grade remained at 11. Other sizable occupations in this group are: Industrial Specialist and Realty (both showing small losses), General Business and Industry, Appraising and Assessing, and Loan Specialist, each showing small increases since 1967. With respect to salaries by area, employees in the Financial Analysis series averaged $15,927 in the Washington area and $13,499 throughout the states; Trade Specialist - $15,389 and $14,305; and Agricultural Marketing - $15,315 and $13,041.

COPYRIGHT, PATENT, AND TRADE-MARK

This is the smallest of all the white-collar occupational groups. Slightly more than 98 percent of the employees are professional (1,779 of the total 1,812). With the exception of 22, all employees in this group were paid at salary rates of the General Schedule system. The median grade (13) and the average salary ($15,679) was the highest of all the white-collar groups.

The proportion of employees occupying upper level positions in this group was the highest of all occupational groups. In 1968, sixty-nine percent of all personnel were reported in grades 12 and above, compared with 68 percent in 1967 and 1966. The average annual salary for the overall group increased by $1,268 to $15,679.

Patent Examining, by far the largest in the group, showed a net increase of 9 to 1,158. All employees in this series (who comprised 64 percent of the total) were (a) under the General Schedule system and (b) employed by the U.S. Patent Office. The median grade for women in this series (their number remaining at 39), rose from 11 in 1967 to 12 in 1968. For the men it remained at 13. Patent Adviser, the second largest occupation, showed a decrease of 29 to 229. Patent Administration with 67 and Patent Interference Examining with only 8 had a median grade of 16 and continued to carry the highest average salaries -- $24,037 and $25,207, respectively. All personnel in these two occupations were employed by the Commerce Department and, with the exception of one employee in the Patent Administration, all were employed in Washington area.

The median grade for all professionals in this group was 13 and the average annual salary was $15,761. The 116 women in these occupations had a median grade of 11 and received an average salary of $11,966. Throughout the 50 states salaries were highest for employees in the Patent Attorney series ($19,276) and the Patent Advisor series ($16,231).

PHYSICAL SCIENCE

Employment in the Physical Sciences (43,425 in 1968) increased by 2 percent. This group ranks eighth in population among the non-postal occupational groups. The major employers of these personnel are the three military departments, the Departments of Commerce and Interior, the National Aeronautics and Space Administration, and the Departments of Agriculture and Health, Education, and Welfare, in that order. Commerce and Agriculture each showed a small decrease. Each of the other major employers reported small increases. The predominant classifications for personnel in these occupational series are: the General Physical Scientist with 2,270 in the Washington area and 4,172 throughout the states; Chemist - 2,108 and 6,316, respectively; and Physicist - 1,824 and 4,317, respectively.

Nearly all of the physical science employees (97 percent) were paid salary rates of the General Schedule system. The median grade remained at 11 for the entire group. For men it rose from 11 in 1967 to 12 in 1968 and for women it rose from 7 to 9. This rise in the median grade is a reflection of the upward trend in the number of employees occupying upper level positions as a proportion of the group total. In 1968, grades 12 and above comprised 47 percent of all physical science personnel, as compared with 45 percent in 1967 and 44 percent in 1966. The average annual salary for the overall group increased by $1,206 to $13,216.

The number of professional physical scientists has increased by slightly over 3 percent since the 1967 survey, to a total of 33,120 in 1968. These employees represent over 76 percent of the group total. Chemistry remained the largest of these occupations with 8,474, representing an increase of slightly over 2 percent. The next largest professional occupations are General Physical Science and Physics. Other sizable occupations are Cartography, Meteorology, Geology, and Hydrology. With the exception of Geology, each of the series showed small gains since the last survey.

The median grade equivalent remained at 12 for men and at 9 for women. The overall average salary was $14,933 for men and $11,625 for women. Salaries in the Washington area were highest for employees in the General Physical Science ($19,586), Forest Products Technology ($18,128), and the Hydrology ($17,254) series. While throughout the states those in Astronomy and Space Science ($16,736), General Physical Science ($16,640), and Photographic Technology ($15,047) continued to receive above-average salaries.

Employees providing technical support to the professional physical scientists numbered 9,531, a slight decrease since the 1967 survey. Nearly all of the loss occurred among Cartographic Technicians. Occupations showing smaller decreases were Physical Science Technician and Meteorological Technician. The remaining 774 nonprofessional employees in this group were in the Navigational Information, Physical Science Student Trainee, and Document Analysis series.

For nonprofessionals the overall median grade remained at 6 for women, while it rose from 7 in 1967 to 8 in 1968 for men. The average annual salary increased by $574 to $8,362. Above average salaries were reported in the Washington area and the states in the following occupations: Navigational Information - $12,919 and $11,091; Document Analysis - $12,413 and $14,087; Geodetic Technician - $9,177 and $9,593; and Meteorological Technician - $8,459 and $8,870, respectively.

LIBRARY AND ARCHIVES

The number of personnel in the Library and Archives occupations increased by 9 percent to 8,425 in 1968. Women occupied 65 percent of all positions reported. The Library of Congress, by far the largest employer with nearly 26 percent of the total, reported an increase of 16 percent to 2,161. The other major employers were the three military departments and the General Services Administration, each showing small gains. Eighty-two percent of all employees were reported in two occupations -- Librarian and Librarian Technician. The Librarian series remained the most heavily populated in the Washington area with 1,196 and ranked number two in the group throughout the states with 1,479 employees. Library Technician became the largest occupation for employees in the states with 1,510 and continued second in Washington with 1,707.

Virtually all (99 percent) of the Library and Archives personnel were paid at salary rates of the General Schedule system. The median grade remained at 7 for all employees and for women, while for men it rose from 7 in 1967 to 8 in 1968. The proportion of employees occupying upper level positions continued to show a steady increase. In 1968, nearly 14 percent of all personnel were reported in grades 12 and above, compared with 13 percent in 1967 and 12 percent in 1966. The average annual salary for the overall group increased by $442 to $8,937. Average salaries for men and women were $9,840 and $8,447, respectively.

A net increase of 70 employees was reported in the 2 professional occupations since 1967, for a total of 3,906 in 1968. Librarian, the largest occupational series in the group, showed an increase of nearly 3 percent to 3,619. Archivist, the other professional occupation, decreased by nearly 7 percent to 287. The General Services Administration employed 85 percent (244) of all the employees in the series. The overall median grade equivalent for personnel in these two series was up from 9 in 1967 to 10 in 1968, while remaining at 11 for men and 9 for women.

Average annual salaries were $12,225 for men and $10,311 for women. Personnel in the Archivist series continued to receive the higher salaries both in the Washington area and throughout the states, averaging $12,162 and $11,568, respectively. Those in the Librarian series averaged $11,512 and $9,997, respectively.

Employment in the nonprofessional occupations, which comprised over half of the group total, increased by over 16 percent, to 4,519. Library Technicians (72 percent of the nonprofessionals) increased by 9 percent, to 3,269. The other two occupations, Technical Information Services (635) and Archives Technician (615), reported increases of 59 and 24 percent, respectively. Over 87 percent of all Archives Technicians are employed by the General Services Administration. Employees in the Technical Information Services series continue to be the highest paid of all personnel in this group (professional and nonprofessional) with an average salary of $12,628 in the Washington area and $11,595 throughout the states.

Employees were reported in each of the 5 occupational series under this group. No series were added or discontinued since the last survey. The title and definition of Archives Assistant was changed to Archives Technician.

MATHEMATICS AND STATISTICS

Employment in the Mathematics and Statistics group is virtually the same as for the last survey, 15,636 in 1967 and 15,575 in 1968. The three military departments were by far the largest employers of personnel in this group. Each reported small increases except Army (largest of the three) which reported a decrease of 58, from 3,066 to 3,008. Among the three other major employers, the Departments of Commerce and Agriculture both reported small decreases to 1,702 and 1,425, respectively; the Department of Health, Education, and Welfare reported an increase of 49 to 1,212. Although the number of employees in the Statistical Assistant series has shown a consistent decline in this decade of the computer, it still remains the most heavily populated of these occupations in the Washington area with 3,295. Throughout the states it was outnumbered by mathematicians, 3,138 to 2,702.

Nearly all (98 percent) of the mathematical science employees were paid salary rates of the General Schedule system. A significant shift in the grade structure was evidenced by the percentage increase in the upper level positions since the last survey. In 1968, nearly 34 percent of all personnel were reported in grades 12 and above, compared with 30 percent in 1967 and 29 percent in 1966. The median grade for the entire group rose from 7 in 1967 to 9 in 1968 and from 5 to 6 for women. The median grade for men remained at 12. The average annual salary for the group increased by $974 to $10,962. For men it was $13,446 and $8,023 for women.

The number of employees in the 6 professional occupations increased by slightly over 9 percent, to 8,910. Mathematics, the largest professional occupation, increased by nearly 4 percent, to 4,272. Almost three-fourths of the Mathematicians were located throughout the 50 states. The major employers were the three military departments (3,057) and the National Aeronautics and Space Administration (662). The most significant change among the professional mathematics occupations was an increase of 42 percent in the Operations and Research series to 1,541 in 1968. For the most part, this gain took place in the defense agencies which accounted for 87 percent of that net gain. Statistician, the only other significantly populated professional series, showed a decrease (about 1 percent) to 2,244. Nearly two-thirds of all statisticians were employed in the Washington area, with most of the major agencies each reporting representative numbers.

The median grade for professional mathematicians remained at 12 overall and for men, and at 11 for women. For total employment the average salary was $13,924. For men it was $14,486 and $11,540 for women. The highest average salary was reported for employees in the Operations Research series -- $18,870 in the Washington area and $16,394 in the states. This was followed by Actuary at $16,849 and $15,186; Mathematicial Statistician at $15,917 and $13,233; Statistician at $15,251 and $13,233; and Mathematician at $12,554 and $12,003.

Employment in the nonprofessional occupations decreased by 11 percent to 6,665. Women occupied over 81 percent of these positions. Statistical Assistant, the largest series in the entire group, showed a decrease of nearly 11 percent to 6,044. Women represent 84 percent of this total. The Department of the Army with 1,188 Statistical Assistants, is the largest employer of these personnel.

The median grade equivalent for employees in the nonprofessional occupations remained at 5 for both men and women. Their overall average salary increased by $343 to $7,019. Average salaries for men and women were $7,422 and $6,927, respectively.

Employees were reported in each of the 11 occupational series in this group. No series were added or discontinued since the last survey.

EQUIPMENT, FACILITIES, AND SERVICE

Employment in this group increased by slightly over 6 percent in 1968 to 20,402. Over 87 percent of these personnel were located in the United States but outside Washington, D. C. The three military departments were the only agencies reporting over 1,000 employees each and together accounted for slightly over 76 percent of the group total. Other agencies employing a sizable number were the Tennessee Valley Authority (619) and the Department of Housing and Urban Development (583).

Sixty-nine percent of all employees in the entire group were reported in one occupational series -- Equipment Specialist which numbered 14,078. The only other two occupations having a significant number were Construction and Maintenance (2,871) and Facility Management (1,321), each showing sizable increases, 9 and 14 percent, respectively.

Nearly all employees in this group (93 percent) were paid salary rates of the General Schedule system. The median grade equivalent remained at 11 for all employees and for men, and at 9 for women. This year almost 24 percent of these personnel were reported at grades 12 and above, compared with 22 percent in 1967 and 1966. The average annual salary was up by $610 to $10,933. The average salary for men was $10,968 and the 377 women in the group averaged $8,962.

Employees were reported in each of the 10 occupational series in this group. Qualification standards for entry level positions in these occupations, in general, do not require professional or academic training. No series were added or discontinued since the 1967 survey.

EDUCATION

Employment in the educational field increased by nearly 10 percent since the 1967 survey to 26,614 this year. This is due primarily to a gain of 1,654 employees working in foreign countries for the military departments. Over 58 percent of all employees in the entire group were reported in the Education and Vocational Training series which accounted for three-fourths of the employment gain. For the most part, these are "teachers" in school systems administered by the Federal agencies. The only large employers of personnel in the Education field were the three military departments (with 65 percent of the total) and the Interior Department, with 21 percent.

Nearly 62 percent of all employees in the Education occupations were located in the United States. Another 28 percent (mostly in the Education and Vocational Training series) were employed in foreign countries. Fifty percent (5,008) of those employees in foreign countries were reported by the Department of the Army and 40 percent (2,190) by the Department of the Air Force. All were employed in schools for dependents' children. Education Research and Program with 745 (a decrease of 5 percent since 1967) and Education and Vocational Training with 650 remained the major occupations for employees in the Washington area. Instruction (with 8,930) and Educational and Vocational Training (with 6,517), both showing small gains, continued to be the most heavily populated throughout the states.

Base salaries for Federal employees in the Education field are normally commensurate with prevailing rates in the locality where employed and are thus, for the most part, geared to the 10-month school year. Nearly 67 percent of the personnel in these Education occupations were paid at rates of the General Schedule system.

In 1968, as for each of the two previous years, 15 percent of the employees in these occupations were reported at grades 12 and above. While no significant changes occurred in the overall proportion of employees in upper level positions, a small net gain is reflected over that reported in 1967. The median grade for all employees rose from 8 in 1967 to 9 in 1968. For men and women it remained at 9 and 6, respectively. The average annual salary for the overall Education group increased by $497 to $9,430 in 1968. Average salaries for men and women were $10,577 and $7,627, respectively.

The number of employees in the 3 professional Education occupations increased by nearly 13 percent since the last survey to 16,319 in 1968. Professional employees account for 61 percent of the overall group total. The bulk of the professional employees (93 percent) are in the Education and Vocational Training series, which was up by 14 percent to 15,269. Education Research and Program (1,010) and Public Health Education (40), the other two professional series each showed a net gain of 10 employees.

The median grade for the professional Education employees overall (9) and for men (10) remained the same as in the 1967 survey, while for women it dropped from 7 in 1967 to 6 in 1968. Salaries averaged $11,666 for men and $7,883 for women. The small number of personnel in the Public Health Education series averaged $16,971 in the Washington area and $13,366 throughout the states; Education Research and Program - $16,641 and $16,942; and Education and Vocational Training - $13,929 and $10,509, respectively.

Employment in the nonprofessional Education occupations increased approximately 4 percent to 10,295. The Instruction series, which comprises 92 percent of all nonprofessional Education employees had a net increase of 135 to 9,441. A significant increase took place in the Education and Training Technician series (the second largest nonprofessional occupation), going from only 2 employees in 1967 to 414 in 1968. The combined employment in the other three lesser populated, occupations showed a net decrease of 60 to a total of 440.

For all nonprofessional employees in this occupational group, the overall median grade rose from 7 in 1967 to 9 in 1968, while remaining at 9 for men and at 4 for women. The overall average salary was $8,953. The average salary for men was $9,530 and for women it was $6,561. Personnel in the General Education and Training series averaged $15,846 in the Washington area and $11,436 throughout the states; Education and Training Technician - $10,130 and $6,530; and Instruction - $9,825 and $8,814, respectively.

Employees were reported in each of the 8 occupational series under this group. No new series were added or discontinued since the last survey.

INVESTIGATION

Since the last survey (1967), the number of Federal investigators and inspectors, concerned with law enforcement, increased slightly (about 1 percent), to 34,983. Over 80 percent of these employees are concentrated in three agencies -- the Department of the Treasury (Bureau of Customs and Internal Revenue Service), Justice (Federal Bureau of Investigation and

Bureau of Immigration and Naturalization), and Agriculture (Consumer Marketing Service). The Departments of the Treasury and Justice each had 31 percent, while Agriculture had 18 percent of the reported total.

Approximately 90 percent of these law enforcement employees are located throughout the states and 7 percent in the Washington area. Moreover, 34 percent (10,762) of all employees in the states and 71 percent (1,855) of those in the Washington metropolitan area were reported in one series -- Criminal Investigating. This series showed a slight decrease since 1967 but still remained the largest occupation, with 12,818 employees. Over 59 percent of these investigators (7,583) are in the Department of Justice and another 37 percent are employed by the Treasury Department.

All but 80 employees in the Investigations group were paid salary rates of the General Schedule system. In 1968, 35 percent of all personnel were reported in grades 12 and above, compared with 24 percent in 1966 and 1967. The average annual salary for the overall group increased by $729 to $11,613. Men averaged $11,693, while the 898 women averaged $8,583.

Employees were reported in each of the 26 occupational series in this group, where qualification standards for entry level positions classified under these occupation do not require rigid professional or academic training. No series were discontinued; however, 36 employees were reported in the newly added Food and Drug Inspection Technician series, since the 1967 survey.

COMMODITY QUALITY CONTROL, INSPECTION AND GRADING

The number of employees in the Quality Control occupations remained relatively stable at 21,387 in 1968. The defense agencies continued as the major employers of these personnel. The Defense Supply Agency with 8,852 (over 41 percent of the group total) was by far the largest employer. The Departments of the Air Force, Army, and Agriculture followed with 3,120; 2,890; and 2,868; respectively. Significant increases were reported by the Navy (12 percent) and Army (8 percent), while Agriculture decreased by 5 percent.

Nearly all (97 percent) of the employees in these occupations were located in the United States. Electronic Equipment Quality Control and Inspection remained the largest series (with 3,005), followed by Agricultural Commodity Grading (2,748), Mechanical Equipment Quality Control and Inspection (2,624) and General Commodities Quality Control and Inspection (2,159). Other than the Quality Control and Inspection Management series, which comprised over one-third (122) of the 355 employees, there were no sizable occupational concentrations in the Washington area.

Virtually all employees in the quality control occupations (97 percent) were paid at rates of the General Schedule system. The number of employees in upper level positions continues to grow. During this survey, 14 percent of all personnel in these occupations were reported in grades 12 and above, compared with 13 percent in 1967 and 12 percent in 1966. The median grade remained at 9 for all employees and for men, and at 7 for women. The average annual salary for the overall group increased by $672 to $10,333. The average salary for men was $10,384, while the 524 women averaged $8,298.

Electronic Equipment Quality Control and Inspection remained the largest in the quality control occupations, despite a decrease of nearly 1 percent to 3,081. Changes in the other largest occupations were: a decrease of 4 percent in Agricultural Commodity Grading, 2 percent in Mechanical Equipment Quality Control and Inspection, and an increase of about 4 percent in the Quality Control and Inspection Management series. Salaries for personnel throughout the states continued highest for Quality Control and Inspection Management ($12,203), Space System Quality Control ($11,650), and Missile Quality Control and Inspection ($11,272). Personnel in the Quality Control and Inspection Management series averaged $15,424 in the Washington area.

Employees were reported in each of the 22 occupational series under this group. Generally speaking, qualification standards for entry level positions classified under these occupations do not require rigid professional or academic training. No series were added or discontinued since the last survey.

SUPPLY

The supply group remained fifth in size among the non-postal occupational groups. The number of employees reported in occupations in this group (almost 1/2 of whom are women), increased by less than one percent since 1967 to 82,625 in 1968. The defense agencies reported nearly 86 percent of the group total, followed by the Veterans Administration with 4 percent or 3,070. The Departments of the Army (25,387) and Navy (16,043) showed increases of 2 and 5 percent, respectively; while the Department of the Air Force reported a decrease of 3 percent to 21,686. Employment in the other major employing agencies remained almost unchanged.

About 91 percent of the employees in the supply occupations were located throughout the states and 7 percent in the Washington area. The Supply Clerical and Technician series remained the most heavily populated both in the Washington area and throughout the states with 1,622 and 32,449, respectively. General Supply followed with 1,208 and 8,502 and Inventory Management with 786 and 13,219.

Virtually all (over 98 percent) of the employees in the supply occupations were paid at rates of the General Schedule system. The median grade remained at 5 for all employees and at 7 for men. For women it rose from 4 in 1967 to 5 in 1968. The average annual salary for the overall group increased by $434 to $7,873. Average salaries for men and women were $9,027 and $6,686, respectively. Employees in the Supply Management series remained at the top with regard to salary, averaging $15,726 in the Washington metropolitan area and $11,701 in the states. General Supply followed with $11,757 and $9,310. Other series worthy of note are: Inventory Management - $11,112 and $10,032; Purchasing - $6,843 and $6,329; Supply Clerical and Technician - $6,284 and $5,980; and Sales Store Clerical - $5,422 and $5,502.

Employees were reported in each of the 10 occupational series under this group. Qualification standards for entry level positions classified under these occupations, in general, do not require rigid professional or academic training. Effective in June 1968, the Supply Clerical and Technician series was added. At the same time, both Supply Clerical and Assistance and the Publication Supply series were discontinued.

TRANSPORTATION

The number of employees in the transportation occupations increased by over 10 percent since 1967 to 36,011 in 1968. This is by far the greatest rate of growth of all occupational groups and accounted for nearly 11 percent of the total increase in the full-time white-collar workforce since 1967. For the most part, this increase reflects the expanded activities of the Federal Aviation Administration in the Department of Transportation. This department, where over 55 percent of all employees in transportation occupations are employed, reported a gain of over 10 percent since 1967 to 19,947. The only other large employers were the defense agencies, which together accounted for another 35 percent of the group total. The Department of the Navy (smallest employer of these personnel among the three military departments), reported an increase of over 60 percent to 2,637. Only moderate increases were shown by the other military departments.

About 89 percent of all transportation personnel were located throughout the states and 9 percent in the Washington, D. C., metropolitan area. Air Traffic Control was the most populous series, with 58 percent of all the transportation employees throughout the states and 30 percent of those in the Washington area.

Over 97 percent of all employees in these occupations were paid at salary rates of the General Schedule system. The number of employees occupying upper level positions as a proportion of the overall group total changed very little. In 1968, as in 1966, thirty-three percent were reported in grade 12 and above, compared with about 34 percent in 1967. The median grade remained constant for all employees at 10. It was 11 for men and 5 for women. The average salary for the overall group increased by $529 to $10,685; for men $11,563 and $6,934 for women.

The Air Traffic Control series, which accounts for over 55 percent of all employees in the Transportation group, showed an increase of slightly over 10 percent to 19,883. Changes in the other largest occupations were: Shipment Clerical with an increase of 26 percent to 3,129; Freight Rate up by 4 percent to 2,333; and General Transportation with an increase of 7 percent to 2,044. The highest average salaries were reported for employees in the Aircraft Operation series - $16,297 in the Washington area and $13,895 throughout the states. Next were employees in General Transportation - $13,474 and $9,014; Traffic Management - $13,465 and $11,910; and Air Traffic Control - $12,891 and $11,967.

Employees were reported in each of the 17 occupational series under this group. Qualification standards for entry level positions classified under these occupations, in general, do not require rigid professional or academic training. No new series were added or discontinued since the last survey.

MISCELLANEOUS OCCUPATIONS

This group includes positions which cannot be included in other groups either because the duties are unique, or because they are complex and would come, in part, under various groups. Employment in these occupations (40,190) have increased by slightly more than 1 percent since 1967. Of these employees, 65 percent were reported in occupations concerned with the maintenance of security, that is, the protection of property and people against fire and crime. The defense agencies again led in the number of employees in these series. They employ 57 percent of the total reported. Other agencies employing a significant number were the Department of Justice (5,133), General Services Administration (3,134), Veterans Administration (1,618), and the Post Office (1,418).

The Guard series continues as the predominant occupation in the Washington area, with 3,474 employees. In the 50 states, it is second, being exceeded by the Fire Protection and Prevention series. Other occupations continuing to be heavily populated throughout the states were Correctional Officer (2,703), Security Administration (1,820), and Safety Management (1,409). Fingerprint Identification with 1,254 was the only other series having a significant number in the Washington area.

Ninety-two percent of all employees in this group were paid salary rates of the General Schedule system. The proportion of employees occupying upper level positions showed a small gain. In 1968, over 7 percent of these personnel were reported in grades 12 and above, compared with slightly less than 7 percent in 1967 and 6 percent in 1966. The median grade remained at the 1967 level for all employees and for men, but rose from 5 to 6 for women. Average salaries for men and women were $7,444 and $7,235, respectively.

Chaplin and Urban Planning were the only professional occupations in this group. Of the 385 Chaplins (all men), 305 were reported by the Veterans Administration. The Department of Housing and Urban Development reported 108 of the 222 total employees in the Urban Planning series. The median grade for professional employees in these occupations remained at 12 for total employees and for men, while for women it rose from 11 in 1967 to 12 in 1968. The overall average salary for the group was $13,769.

Among the protective occupations, Guard remained the largest with 13,868 or nearly 35 percent of the group total. Only slightly smaller, Fire Protection and Prevention reported 12,626, an increase of nearly 3 percent since 1967. The median grade for personnel in these nonprofessional occupations remained at 5 overall and for men, while for women it rose from 5 to 6 from 1967 to 1968. The average salary for these employees was $7,344; $7,350 for men and $7,200 for women.

The highest average salaries were reported for employees in the Safety Management series ($13,499 in the Washington area and $10,927 in the states), followed by Security Administration ($13,363 and $10,962), Correctional Officer ($11,904 and $8,099).

Employees were reported in each of the 20 occupational series under this group. No series were added or discontinued since the last survey.

POSTAL OPERATIONS

The postal occupations are unique in that all positions are concerned with either the handling processes or the direct pick up and delivery of the

United States mail. Total employment in the Postal group far exceeds that in any of the 22 purely white-collar occupational groups previously covered. The 585,838 full-time employees in this group represents an increase of 17,588, or slightly more than 3 percent since 1967. This gain in Postal occupations accounts for nearly 57 percent of the overall increase in the full-time white-collar workforce since 1967. With the exception of two employees reported by the Panama Canal Company, the entire employment is under the Postal Field Service system in the Post Office Department.

Other Postal Distribution, which for the most part includes the mail handlers and distribution clerks, remained the most heavily populated Postal occupation. The second largest series was the Postal Collection and Delivery which increased by about 5 percent, to 9,880. Rural Carriers increased by nearly 5 percent (1,345) to 30,906, while the number of postmasters in fourth class post offices decreased by nearly 11 percent (782) to 6,967. Over two-thirds of the personnel reported in the Fourth Class Postmaster series were women.

With the exception of Rural Carriers and Fourth Class Postmasters, employees in the Postal occupations are paid salary rates of the Postal Field Service system. Separately established salary schedules, commensurate with appropriate work requirements, are utilized for Rural Carriers and Fourth Class Postmasters. The average salary for the overall Postal group was $7,288. The corresponding average for men is $7,351. For women it is $6,927. The average salaries of employees in the Postal Inspection series remained the highest, with $12,605 in the Washington metropolitan area and $12,676 throughout the states. Other Postal Distribution averaged $7,108 and $7,070; while first, second, and third class post offices averaged $10,312 in the Washington area and $9,195 throughout the states.

Employment was reported in each of the 12 Postal occupational series. Qualification standards for entry level positions classified under these occupations do not require rigid professional or academic training. No series were added or discontinued since the 1967 survey.

APPENDIXES

APPENDIX A

Definitions and Explanations

Sources of Data

Data presented in this publication were derived from surveys on "Occupations of Federal Civilian Employees" conducted by the U. S. Civil Service Commission. These surveys, conducted periodically prior to 1966 and annually thereafter, provided for submission of comprehensive reports covering paid full-time civilian personnel by Federal agencies. Figures include full-time employees in both permanent and temporary positions, whether occupants of competitive or excepted positions (i.e., subject to competitive examination under civil service law or excepted from competitive examination by law and Executive order, respectively).

In 1968, as in 1967 and 1966, data were collected as of October 31. In each of these years, data were collected for men and women by four major geographic areas. The four areas are: (1) the Washington, D.C. Standard Metropolitan Statistical Area; (2) United States (i.e., the 50 states) excluding the Washington, D. C. metropolitan area; (3) Territories; and (4) Foreign Countries. The Washington, D.C. Standard Metropolitan Statistical Area includes: the District of Columbia; Montgomery and Prince Georges counties, Maryland; the cities of Alexandria, Fairfax and Falls Church, and the counties of Arlington, Fairfax, Loudoun and Prince William, Virginia. Loudoun and Prince William counties were included as of July 1967.

Occupational Terminology

"White-Collar" employment refers to all personnel under the General Schedule Classification and other non-wage system employees as provided for in the Handbook of Occupational Groups and Series of Classes, published by the Civil Service Commission. Additional coverage includes the Postal Operations group, encompassed within the single agency Postal Field Service system, which is provided for in the Personnel Handbook, Series P-1, published by the Post Office Department. The occupational terminology is also provided in the Commission's handbook. An "occupational group," as defined there, is a major subdivision of the General Schedule. Each occupational group embraces generally, several series of classes of positions in associated or related occupations, professions, or activities, within the schedule. A "series" or "series of classes" is a subdivision of an occupational group, consisting of one or more classes of positions similar as to specialized line of work but differing in difficulty or responsibility of work, and therefore in grade and salary range.

The term "professional" (identified on statistical tables as PROF), as applied to individual occupations, is based on the definitions and position classification standards contained in the Civil Service Commission's handbook, referenced previously. These standards relate to the type or subject matter of work, the level of difficulty or responsibility involved, and the educational requirements. In general, application is to positions where the duties include "... work which is based upon the established principles of a profession or science, and which requires professional, scientific, or technical training equivalent to that represented by graduation from a college or university of recognized standing".

Coverage of Agencies

This report covers all full-time civilian white-collar personnel employed in the United States, and all U.S. citizens employed overseas by the Federal Government except employees of the Board of Governors of the Federal Reserve System, Members and employees of the Congress, and employees of the Central Intelligence Agency and the National Security Agency.

Pay Systems

The General Schedule system is comprised of all employees under the General Schedule classification and those not under this classification, but who are paid the established salary rates of the General Schedule, although not legally required to do so. This latter group is commonly referred to as "Similar to GS." The Postal Field Service system represents all employees of the Post Office Department with the exception of 2,304 personnel under the General Schedule classification and 14 top level administrative appointees employed in the Washington, D.C. headquarters.

Appendix Tables B-1 and B-2 present data by each of the four pay system categories. Included in the "Similar to GS" category are those employees in Canal Zone General Schedule type positions. Employees under all other statutory pay systems (e.g. Foreign Service; Veterans Administration, Department of Medicine and Surgery) and those whose salary rates are determined administratively are combined into the category "White-Collar With Salary". The only employees for whom no grade or salary was reported (for the most part limited to the Legal and Kindred group and more specifically to the Miscellaneous Legal and Kindred series) were in the Judicial Branch.

Grades and Salaries

As presented for the first time in the 1966 edition of this publication, the grades shown represent "grades or levels" of the various pay systems considered equivalent to specific General Schedule grades. (Grade distribution data published prior to 1966 included only those employees in General Schedule or Similar to GS pay systems.) The equivalency was mostly derived by comparing the 4th step GS rates with comparable salary rates in other pay systems. Where salary rates were above the General Schedule, (e.g., Executive Salary Act; some Public Law type positions) these employees are identified in the statistical tables as "ABOVE 18". Employees in the Judicial Branch for whom no grade or salary was reported (for the most part support staff to the Federal judges and courts throughout the Nation), are identified as "N.G.".

The "median grade" represents the mid-point--the grade of the middle employee in the distribution, with an equal number of employees being above or below. The "average salary" is the arithmetic mean salary.

In general, the salaries paid to individual workers depend on their grade level and length of service within that grade. Each position within an occupation is rated as to grade, and each successively higher grade requires higher levels of duties and responsibilities. Additionally, for certain occupational series and grades within these series, special higher rates than prevail in the general salary structure are paid when necessary to recruit and retain well-qualified personnel. Some personnel in all of the professional engineering occupation series and many of the other scientific and professional occupations receive such special rates.

While the average salary data in this report generally includes the "Special rates" paid for "Shortage Category" occupations, it excludes overtime, premium pay for night work or unusual hours, and post differentials or cost-of-living allowances paid to certain employees serving outside the limits of the 48 contiguous states.

Where To Go For Employment Information

Information on Federal employment opportunities is available from a number of sources. For college students, the college placement office is often a good source of such information. High school students in many localities may obtain information from their high school guidance counselors. Additional information may be obtained from State employment service offices and many post offices.

The Interagency Board system, operated by the U.S. Civil Service Commission, consists of boards of examiners located in 65 population centers throughout the country. These boards announce and conduct examinations and evaluate and refer eligible applicants to employing agencies for their geographic areas. They also provide a complete one-step information service, so that all interested citizens may learn of local and nationwide employment opportunities in the Federal Government service. Information about a specific agency also may be obtained by contacting the agency directly.

A/ EXCLUDES EMPLOYEES OF CENTRAL INTELLIGENCE AGENCY, NATIONAL SECURITY AGENCY BOARD OF GOVERNORS OF FEDERAL RESERVE SYSTEM AND FOREIGN NATIONALS OVERSEAS.

B/ THE GRADES OR LEVELS OF THE VARIOUS PAY SYSTEMS HAVE BEEN CONSIDERED EQUIVALENT TO SPECIFIC GENERAL SCHEDULE GRADES SOLELY ON THE BASIS OF COMPARISON OF SALARY RATES, SPECIFICALLY, IN MOST INSTANCES, BY COMPARING THE 4TH STEP GS RATES WITH COMPARABLE RATES IN OTHER PAY SYSTEMS.

BY OCCUPATION AND GRADE, OCTOBER 1968

A/ EXCLUDES EMPLOYEES OF CENTRAL INTELLIGENCE AGENCY, NATIONAL SECURITY AGENCY BOARD OF GOVERNORS OF FEDERAL RESERVE SYSTEM AND FOREIGN NATIONALS OVERSEAS.

B/ THE GRADES OR LEVELS OF THE VARIOUS PAY SYSTEMS HAVE BEEN CONSIDERED EQUIVALENT TO SPECIFIC GENERAL SCHEDULE GRADES SOLELY ON THE BASIS OF COMPARISON OF SALARY RATES, SPECIFICALLY, IN MOST INSTANCES, BY COMPARING THE 4TH STEP GS RATES WITH COMPARABLE RATES IN OTHER PAY SYSTEMS.

BY OCCUPATION AND GRADE, OCTOBER 1968

A/ EXCLUDES EMPLOYEES OF CENTRAL INTELLIGENCE AGENCY, NATIONAL SECURITY AGENCY BOARD OF GOVERNORS OF FEDERAL RESERVE SYSTEM AND FOREIGN NATIONALS OVERSEAS.

B/ THE GRADES OR LEVELS OF THE VARIOUS PAY SYSTEMS HAVE BEEN CONSIDERED EQUIVALENT TO SPECIFIC GENERAL SCHEDULE GRADES SOLELY ON THE BASIS OF COMPARISON OF SALARY RATES, SPECIFICALLY, IN MOST INSTANCES, BY COMPARING THE 4TH STEP GS RATES WITH COMPARABLE RATES IN OTHER PAY SYSTEMS.

BY OCCUPATION AND GRADE, OCTOBER 1968

A/ EXCLUDES EMPLOYEES OF CENTRAL INTELLIGENCE AGENCY, NATIONAL SECURITY AGENCY BOARD OF GOVERNORS OF FEDERAL RESERVE SYSTEM AND FOREIGN NATIONALS OVERSEAS.

B/ THE GRADES OR LEVELS OF THE VARIOUS PAY SYSTEMS HAVE BEEN CONSIDERED EQUIVALENT TO SPECIFIC GENERAL SCHEDULE GRADES SOLELY ON THE BASIS OF COMPARISON OF SALARY RATES, SPECIFICALLY, IN MOST INSTANCES, BY COMPARING THE 4TH STEP GS RATES WITH COMPARABLE RATES IN OTHER PAY SYSTEMS.

BY OCCUPATION AND GRADE, OCTOBER 1968

A/ EXCLUDES EMPLOYEES OF CENTRAL INTELLIGENCE AGENCY, NATIONAL SECURITY AGENCY BOARD OF GOVERNORS OF FEDERAL RESERVE SYSTEM AND FOREIGN NATIONALS OVERSEAS.

B/ THE GRADES OR LEVELS OF THE VARIOUS PAY SYSTEMS HAVE BEEN CONSIDERED EQUIVALENT TO SPECIFIC GENERAL SCHEDULE GRADES SOLELY ON THE BASIS OF COMPARISON OF SALARY RATES, SPECIFICALLY, IN MOST INSTANCES, BY COMPARING THE 4TH STEP GS RATES WITH COMPARABLE RATES IN OTHER PAY SYSTEMS.

BY OCCUPATION AND GRADE, OCTOBER 1968

NOTE: SOME GROUPS WERE RESTRUCTURED, RETITLED, AND/OR REDEFINED AS A RESULT OF NUMEROUS REVISIONS TO CLASSIFICATION STANDARDS DURING THE PERIOD PRIOR TO 1964; THUS, SOME POPULATION FIGURES SHOWN HERE MAY DIFFER SLIGHTLY FROM EARLIER PUBLICATIONS.

A/ FORMERLY TITLED "FINE AND APPLIED ARTS GROUP", WAS RETITLED AND REDEFINED EFFECTIVE DECEMBER 1962. DEFINITION AND COVERAGE WAS EXPANDED TO INCLUDE RELATED KINDS OF OCCUPATIONS PREVIOUSLY INCLUDED IN THE "MISCELLANEOUS OCCUPATIONS GROUP".

B/ FORMERLY TITLED "MECHANIC GROUP", WAS RESTRUCTURED, RETITLED, AND REDEFINED EFFECTIVE JUNE 1964. MANY POSITIONS WERE RECLASSIFIED INTO BLUE-COLLAR OCCUPATIONS; THE TECHNICIAN POSITIONS WERE PLACED IN THE "ENGINEERING GROUP".

C/ PRIOR TO 1960 INCLUDED ONLY "INSPECTION AND GRADING SERIES".

D/ MOST OF THESE POSITIONS WERE INCLUDED IN THE "GENERAL ADMINISTRATIVE, CLERICAL, AND OFFICE SERVICES GROUP".

E/ THIS GROUP WAS OFFICIALLY DISCONTINUED EFFECTIVE FEBRUARY 1963. MOST POSITIONS HAD PREVIOUSLY BEEN RECLASSIFIED INTO BLUE-COLLAR OCCUPATIONS, THE FEW REMAINING WERE PLACED INTO THE NEW "TRADES, CRAFTS, AND LABOR SERIES" IN THE "MISCELLANEOUS OCCUPATIONS GROUP".
